ELHATHOUT ABDELAZIZ

Full-Stack Developer (PHP, Symfony, Laravel, Vue.js)

PROFILE

Passionate Full-Stack Developer, specialized in PHP (Symfony/Laravel) and Vue.js.

Expertise in building complete web applications, robust APIs, and dynamic interfaces.
Strong focus on user experience and maintainable architecture.

Technically curious with a pragmatic mindset.

Clean code, automated tests, and Agile methodology.

TECHNICAL SKILLS

Back-End: PHP (Laravel, Symfony), SQL, REST API

Architecture: MVC, Hexagonal

Design Patterns: Creational, Structural, Behavioral

Front-End: JavaScript, Vue.js, HTML/CSS

Architecture: Atomic Design

Tools: Git/GitHub, Jira, Docker (basics)
Unit/Integration Testing

Other: RabbitMQ (basics), WordPress (basics), AWS (basics)

PROJECTS

2024–Present

Full-Stack Developer – Decq Print

github.com/decq-print

• Back-End:

- API development for:
 - Machine fleet management (CRUD with real-time status)
 - Production orchestration:
 - Smart scheduling of production slots
 - Management of operational constraints (maintenance, breaks)
 - Machine capacity analysis:
 - Optimal load rate calculation
 - Production time estimation
 - Operational constraint handling
- Logistics platform:
 - Automated document generation:
 - Shipping labels with barcodes
 - Multilingual invoices (FR/EN/ES)
 - Customs documents (Commercial Invoice)
 - Dynamic integration:
 - Fetching branding assets from AWS S3
 - Automatic adaptation to client (logos, legal mentions)

• Front-End:

- UI development for:
 - CRUD management of production machines
 - Per-machine scheduling:
 - Configurable time slots
 - Reservation visualization
 - Exception handling
 - Statistical dashboards:
 - Machine usage rates
 - Real-time production tracking
 - Maintenance alerts
- Orders module:
 - Shipment tracking
 - Automatic PDF generation:
 - Shipping slips
 - Transport documents
 - Customized invoices

• **Stack:** Symfony/Vue.js, Git, GitHub, REST API, Docker, AWS, DOMPDF

2023–2024

Full-Stack Developer – WObz Technologies

github.com/wobz-tech

- **Back-End:**
 - API development for:
 - * Magento 2 integration:
 - Automated order imports via Symfony CLI
 - Real-time stock synchronization
 - * Management workflow:
 - Order and content tracking
 - File management on AWS S3
 - * Financial module:
 - Clients (individuals/businesses)
 - SEPA payments via GoCardless
 - Document generation (invoices, credit notes, statements)
- **Front-End:**
 - Interfaces for:
 - * Order dashboard
 - * Client management
 - * Financial document viewer
 - Ticketing system:
 - * Emergency fixes (Zoho)
 - * Prioritization of critical issues
- **Stack:** Symfony/Vue.js, Git, GitHub, REST API, Docker, AWS (S3/EC2), RabbitMQ, DOMPDF, GoCardless API, Zoho, Magento 2 REST API

05/2023

Engineering Office Management – ADMDI

[github.com | Demo](#)

- Complete management system for an engineering office:
 - Client management (individuals/companies) and intermediaries
 - Service and project tracking
 - Financial module (quotes, invoices, payments)
 - Role-based access control (admin/assistant)
- **Stack:** PHP, MySQL, Bootstrap, JavaScript, Git, DOMPDF

04/2023

Mail Management System (Freelance)

[github.com | Demo](#)

- Application for managing institutional mail:
 - Incoming/outgoing mail tracking
 - Department-level assignment
 - Notification system
 - Fine-grained permission management
- **Stack:** Laravel, MySQL, Bootstrap, JavaScript, Git, TCPDF

03/2023

E-LYRICS | REST API (YOUCODE)

github.com/e-lyrics

- Full-featured music API:
 - CRUD for albums/artists/lyrics
 - RBAC-based permission management
 - Complete Postman documentation
- **Stack:** Laravel, JWT, MySQL, REST API, Postman

01/2023

Coffee Shop (YOUCODE)

github.com/coffee-shop

- Café management application:
 - Interactive menu
 - Ordering system
- **Stack:** Laravel, MySQL, Bootstrap, Git, Trello

11/2022

YouTrain™ Booking (YOUCODE)

github.com/youtrain

- Railway booking platform:
 - Complete management of network (cities/stations/trains)
 - Advanced search engine
 - Ticketing system
- **Stack:** Laravel, MySQL, Bootstrap, Git, Trello

EDUCATION

2022 - 2023	Simplon/YouCode Certificate (Yousseoufia) Intensive training in web development using <i>Learning By Doing</i> methodology (800+ hours of hands-on coding) OCP-Simplon academic partnership	YouCode - Coding School
2020 - 2021	Bachelor's in Distributed Information Systems Focus on distributed architectures (J2EE), advanced web programming	Cadi Ayyad University (Marrakech)
2018 - 2020	DEUST MIPC Multidisciplinary core curriculum: <ul style="list-style-type: none">• Computer Science & Mathematics• Fundamental Physics & Chemistry	Cadi Ayyad University (Marrakech)
2011 - 2017	High School Diploma in Physical Sciences Physical Sciences and Chemistry track Honors: Fairly Good	High School (Taroudant)

PROFESSIONAL EXPERIENCE

05/24 - Present	Full-Stack Developer <ul style="list-style-type: none">• Developing end-to-end printing solutions (order to delivery)• Tech: Symfony, Vue.js, Docker, AWS, REST API, Hexagonal Architecture• <i>All-in-one solution for online printing businesses</i>	Decq Print • Casablanca
06/23 - 05/24	Full-Stack Developer <ul style="list-style-type: none">• Developing reusable packaging customization solutions• Tech: Symfony, Vue.js, Docker, AWS, GoCardless, REST API, Hexagonal Architecture• <i>Subsidiary of global leader Wobz France</i>	Wobz Technologies • Casablanca
05/23 - 06/23 Internship	Full-Stack Developer <ul style="list-style-type: none">• Web development and digital solutions• Tech: PHP, JavaScript, MySQL• <i>Specialist in digital development and marketing</i>	ADMDI • Agadir
01/22 - 04/23	Freelance Developer <ul style="list-style-type: none">• Building custom web apps and websites• Varied technologies based on client needs• 13 months of diverse freelance missions	Portfolio • Yousseoufia
04/21 - 06/21 Internship	Full-Stack Developer <ul style="list-style-type: none">• IT solutions development• Tech: PHP, JavaScript, MySQL• <i>IT services and tech solutions provider</i>	Moritsoft • Marrakech
